MEMORANDUM FOR THE ACTING DIRECTOR:

This memorandum is for information only.

Two articles of some interest to the Agency are in the hopper at
U.S. NEWS & WORLD REPORT.

Clarke Beach is using the Director's Columbia University address as the basis for an article on how the U.S. is lagging re education of scientists and engineers. After talking with DD/I re Beach's request for more detailed statistical information, we referred Beach to the National Science Foundation with the promise to try to help him if he doesn't get all the data he wants --and if we should have the missing information.

Bill Bryant is doing an article along the lines of those which appeared recently with Washington Board of Trade as a source on how the District of Columbia is losing people and business because large government agencies are moving outside the District--the AEC, CIA, etc. He wanted to know if there had been published at any time an "official government" statement of the number of people employed by CIA. He knows that the National Security Act prohibits CIA from making such information available to him. We told him we know of no such "official government" statement.
